Prevents friction burns, pressure sores and abrasions. The soft polyfoam pad is specially contoured so that it comfortably covers your patients' heels, elbows and knees. The oversized stockinette sleeve positions the pad and keeps it securely where it's needed. Skil-Care's Heel/Elbow Protector is also effective as protective covering for bandages and dressings.

LAUNDERING The Heel/Elbow Protectors may be washed and dried at temperatures up to 180°F (82°C). Bleaching is not recommended.
